PROJECT TITLE: Cow Barn Structural Support

LOCATION: Wilder Ranch State Park

COUNTY: Santa Cruz

DESCRIPTION OF THE NATURE AND PURPOSE OF PROJECT:

Install additional structural support in the Wilder Ranch State Park 'Cow Barn' to help stabilize the building due to termite and powder post beetle infestation. This project will install two 8" by 8" wide Douglas fir timber beams next to the damaged beam. Two support posts will also be installed on the interior of the structure and anchored to the concrete floor. Next, the damaged beam will be treated to kill and prevent the return of the termites and powder post beetles. Both beams will be painted with white wash to further protect the members and to match the existing paint scheme on the building.
